## CFLR solutions for family law practice

### Available through The Rutter Group!

Widely used throughout the California court system, DissoMaster support calculation software from CFLR is approved by the Judicial Council. It makes quick work of the tax laws and guideline rules that complicate the practice of family law.

#### DissoMaster

#### Child and Spousal Support

#### Calculation Software

- Calculates guideline child and spousal support
- Converts gross income to guideline net income
- Displays alternate settlements meeting user-specified goals
- Open multiple cases at once in DissoMaster's new tabbed format

DissoMaster is well known for its accuracy. A CPA firm reviews DissoMaster calculations every year to ensure that accuracy.

Updating throughout the year also ensures that calculations stay accurate. You will receive an updated CD each year, as well as mid-year updates each time a statutory or other change affects child or spousal support calculations. Sign up for our email notifications to get alerts when updates are released.

- All on one CD! DissoMaster Suite includes DissoMaster, Executioner, and Propertizer.
- Free! Executioner arrearage calculation software is included free with DissoMaster. This software calculates interest applied to support, legal fees and property division payments. (If purchased separately, Executioner sells for \$289.)
- DissoMaster has two versions to choose from, DissoMaster featuring the new two column layout and Classic featuring the traditional three column layout.
- Dynamic Help. This feature provides specific instructions for each data input field along with applicable statutory citations and case law.
- Your subscription comes with lots of great help resources including online help, telephone training, and usage help provided by West's specialized Reference Attorney team!

### Propertizer

#### Marital Assets and Debt Software

Propertizer makes dividing marital assets and debts easy because it:

- Calculates each item's equity when you enter its fair market value and any encumbrances
- Assigns each item to one party, divides it equally between both parties, or assigns any portion of an item's value to either party
- Displays the after-tax result for each party after you enter state and federal marginal tax brackets and each item's tax basis
- Displays constant recalculations as you formulate proposals
- Allows you to temporarily or permanently delete items from consideration, or insert items into the list
- Minimizes the equalizing payment by considering each item separately for redistribution to the other party
- The *Moore-Marsden* Worksheet allows you to easily work out the marital interest in separately-acquired property
- Customizes capital gains for both short and long term
- Prints Judicial Council Forms 160 and 161
- Handles *Epstein* and *Watts* calculations
- Includes separate-to-separate payments

\$332 purchased separately. Also available as part of the CFLR DissoMaster Suite

### Executioner

#### Arrearage Calculation Software

Executioner makes quick work of calculating arrearages on a series of actual and requested payments for child support, spousal support, family support, attorney fees or property division. It is a complete and easy-to-use solution that:

- Calculates missed and/or untimely payments
- Automatically adds accrued interest and requested penalties
- Simplifies filling out court documents, such as the Writ of Execution (EJ-130), by providing line-by-line input options and allowing you to print out case summaries, case details or a court-ready itemized report
- Ensures mathematic integrity and eliminates numerical problems associated with filing EJ-130 forms

\$289 purchased separately. Free with DissoMaster!
